

SANAKO Lab 100

SANAKO Lab 100

– Affordability and High Performance

in a Language Lab

FACILITATE LANGUAGE TEACHING

Language Learning supports Academic Achievement, provides Cognitive Benefits to Students and Affects Attitudes and Beliefs about other Cultures.

A Language Lab is still the BEST instructional tool available for language learning!

Make Language Learning Attractive

SANAKO Lab 100 is a unique, teacher-led language teaching system that allows you to bring language teaching back to life. The integration of technology with the learning process has the potential to increase participants' motivation and involvement in the learning process and thereby enhances its effectiveness. The Lab 100 offers tools that will keep your students motivated and excited while they learn a new language.

Keep Teachers Involved and Students engaged

Traditional classroom teaching has usually offered interaction between the teacher and only one student at a time, leaving the rest of the class idle and often uninvolved in the learning experience. The SANAKO Lab 100 provides language-learning activities and exercises to keep all students actively engaged.

Develop Students' Language Skills

With its exceptional audio quality, SANAKO Lab 100 offers students the opportunity to develop their world language skills, as well as their listening proficiency, in an environment that is entertaining and stimulating, and which promotes effective language acquisition.

An Affordable and Versatile Option

The SANAKO Lab 100 remains in a class of its own in terms of sheer value for the money in the language teaching market. It is an easy-to-use and durable teacher-led system. It's an ideal solution for schools looking for a language teaching solution that makes use of multiple digital and analog audio sources to create a wide range of learning activities.

Simple and Effective

Students are equipped with digital recorder units that are easy to operate, and which allow them to participate in a number of stimulating learning activities, either alone, or in groups or pairs. Pre-set activities such as phone conversation and listening comprehension make it easy for the teacher to develop lessons.

SANAKO Lab 100 – Practical Tools for Developing Language Skills

- Expose students to authentic language examples using diverse audio sources
- Guide and monitor students individually, or in groups or pairs
- Encourage student enrollment in language courses with stimulating programs
- Help students focus on comprehension and fluency of speech
- Enrich lesson content by accessing digital and Internet resources

SANAKO Lab 100 – Affordability Meets High Performance

- Simple, compact, robust - low maintenance requirement
- Installed in a small space, no special furniture, student computers or dedicated classroom needed
- Economical alternative to a full PC-lab
- Scalable system accommodates up to 60 students
- Automatically converts analog material to digital format
- Facilitates student testing – AP® exam, grading, quizzes, and recorded response

Fits in Any Learning Space

Sanako has once again extended the range of capabilities of Lab 100 by introducing the SANAKO Lab 100 Cart . With the Cart solution, teachers can effortlessly transform any space into a full- featured mobile Lab. Set up a language lab within 5 minutes. Anywhere, anytime!

With ample storage space for student User Panels and Headsets, the SANAKO Lab 100 cart system is completely mobile!

Podcasting

The SANAKO Lab 100 includes a podcasting feature to help teachers make more digital learning material available to students. The solution allows teachers to easily upload digitized or existing MP3 material or other files to the web* for students to access on-line. By making classroom and home study material available on the Internet, teachers can more easily integrate classroom learning with independent study, giving students access to their learning material anytime, anywhere.

*School must have web server or access to web server to support files.

Ask other SANAKO Lab 100 Users:

Having only used Lab 100 for three semesters, John Robinson feels that he is still at the beginning of a marvelous teaching adventure. Lab 100's simple yet varied structure is giving him the chance of a lifetime to teach ESL in a way that maximizes the students' time and gives them a full plate of exercises and experiences on a daily basis. "I'm very pleased with the simple way I can select an exercise for my students through the MSU's easily accessible menu. Gone are the days when I had to search for the right tape in a rack. Now, I can vary each class in a way I was never able to do previously." Robinson says his only fear is that the classes using Lab 100 will become so popular, students will have to be turned away.

*San Francisco City College,
San Francisco, California*

"This lab has so much to offer! Being able to replay their individual work is an incredible tool to help the students improve their pronunciation. And their listening skills have improved dramatically."

Global Language Teaching Staff, Robbinsdale Cooper High School, Minneapolis, Minnesota

SANAKO Educational Solutions

The SANAKO family of educational products combines the best of technology with outstanding sound quality to answer teachers' needs in a variety of teaching environments, ranging from dedicated language teaching labs and software teaching solutions to virtual and multimedia classrooms, and classroom management tools.
